- JavaScript(DOM/React.js)
- Photoshop & Lightroom
- Microsoft word & Excel
- Good Communication Skills

MY PROJECT

Responsive Website

I made Responsive Website using Bootstrap & SASS. I learned hw to use Bootstrap classes and Properties. While coming to SASS I learned how to create reusable CSS code some methods like @import,@inlude,etc

Price Tracker

For this extension I used NPM library (nightmare) to track the ID of the price element and JavaScript for logic to analyze the price has increased or decreased

Tic Tac Toe

In this Particular project I used a CSS as the major element for creating the change of "X O" which are used as mark of user. While for logic I struggled a little but I completed my project by some online research.

Other Projects

My other projects are Movie App , projects on CSS Grid, CSS Flexboxes, which are included in my Github repository
